Gender: Male **Date of birth:** 30 Aug 2002 **Nationality:** Estonian

ABOUT ME

I am a full-stack developer

WORK EXPERIENCE

[28 Feb 2022 – Current] **Web application developer**

Narva Collage

City: Narva

Country: Estonia

Main activities and responsibilities:

I was hired as a team leader for freelance development at a college for good academic performance. We have the task to form an application that will allow us to analyze the speech of Russian-speaking children who live in Estonia. The project helps linguists a lot in their work as well as in the collection of statistics. The project is in development, but was chosen stack Vue + Django python. With this combination, it is possible to achieve the fastest responsive application on the client side and no less fast server side, as python is very well suited for analyzing large amounts of data.

[30 Oct 2021 – Current] **Web application developer**

Vaheta

City: Pärnu

Country: Estonia

Main activities and responsibilities:

While in college, my course supervisor offered me a job through Adapter. Adapter put me in touch with the entrepreneur Tauri Mitt and we started to work together on his author's project, the concept of which is to exchange objects to preserve the environment. The project is under development, but there is already a working prototype at <https://vaheta.me>. The stack for development was chosen by me - Vue + Node.js + Maria db (relation database). This project combines massive data processing. Login via social networks, as well as payment system and online chat between two users based on websockets.

[30 May 2020 –
30 May 2021] **Web application developer**

Jiss OÜ

City: Jõhvi

Country: Estonia

Main activities and responsibilities:

I did an internship at Jiss oü in 2018, for my good progress in PHP, HTML and CSS development I was offered a full-time job, which I started in May 2019. I worked in a Full-stack developer position. I designed and built the site based on customer preferences. For the first two years, I worked only with PHP and Wordpress CMS system. I also fixed bugs in additional existing projects. After that I was allowed to develop company's own CMS system, which was based on Java. I was creating and writing up already working sites on this platform. During this period, I tightened my skills in Java development, and then completely switched to JavaScript (Vue, Jquery) + Node.js development

EDUCATION AND TRAINING

[1 Sep 2019 – Current] **Ida-Virumaa Vocational Education Center (IVKHK)**

Ida-Virumaa Vocational Education Center <https://kutsehariduskeskus.ee/ru>

Address: Kutse 13, 41533, Jõhvi, Estonia
